Index Vol. 75 (2004) RQES

This index is composed of three subindexes: I. Bibliographic Index; II. Author Index; and III. Topic Index.Entries in the bibliographic index are indexed by the last name of the author or, in the case of multiple authors, by the last name of the first author. Reference information for each entry includes the name(s) of the author(s), title of the article, and the volume number and pages on which the article may be found. The author index cites the name of each author included in the volume, followed by the volume number and pages of the article. In cases in which the cited author is not the first author of the article, the first author is cited in parentheses so that the article may be located in the bibliographic index. In the topic index, each article is listed under those important subjects about which the article provides information. The volume and page numbers are also provided.

Topic Index

Ability beliefs. Children's Motivation in Elementary Physical Education: A Longitudinal Study. 1, 71–80.

Accelerometer. Comparison of the Computerized ACTIV-ITYGRAM Instrument and the Previous Day Physical Activity Recall for Assessing Physical Activity in Children. 4, 370–380.

Achievement goals. A Longitudinal Perspective of the Relationship Between Perceived Motivational Climate, Goal Orientations, and Strategy Use. 3, 315–325.

Achievement goals. Children's Motivation in Elementary Physical Education: A Longitudinal Study. 1, 71–80.

Achievement motivation. A Longitudinal Perspective of the Relationship Between Perceived Motivational Climate, Goal Orientations, and Strategy Use. 3, 315–325.

Adiposity. Relationships Between Body Composition and Fundamental Movement Skills Among Children and Adolescents. 3, 238–247.

Adolescents. Coeducational and Single-Sex Physical Education in Middle Schools: Impact on Physical Activity. 4, 446–449.

Adolescents. Physical Activities and Sedentary Pursuits in African American and Caucasian Girls. 4, 352–360.

Aerobic capacity. Effect of Acute 60 and 80% VO2max Bouts of Aerobic Exercise on State Anxiety in Women of Different Age Groups Across Time. 2, 165–175.

African American. Factorial Validity and Invariance of a Self-Report Measure of Physical Activity Among Adolescent Girls. 3, 259–271.

Aging. Physical Activity and Executive Control: Implications for Increased Cognitive Health During Older Adulthood. 2, 176–185.

Anterior cruciate ligament. Gender Differences Among Sagittal Plane Knee Kinematic and Ground Reaction Force Characteristics During a Rapid Sprint and Cut Maneuver. 1, 31–38.

Anxiolytic effect. Effect of Acute 60 and 80% VO2max Bouts of Aerobic Exercise on State Anxiety in Women of Different Age Groups Across Time. 2, 165–175.

Assessment. Comparison of the Computerized ACTIVITY-GRAM Instrument and the Previous Day Physical Activity Recall for Assessing Physical Activity in Children. 4, 370–380.

Assessment. High School Students' Physical Education Conceptual Knowledge. 3, 272–287.

Basketball. Individual Differences of Action Orientation for Risk Taking in Sports. 3, 326–336.

Behavior change. Self-Efficacy and the Stages and Processes of Change Associated With Adopting and Maintaining Muscular Fitness-Promoting Behaviors. 2, 186–196.

Bimanual control. Movement Time Modulates Spatial Assimilation Effects in Rapid Bimanual Movements. 2, 203–208.

Bimanual coordination. Movement Time Modulates Spatial Assimilation Effects in Rapid Bimanual Movements. 2, 203–208.

Binocular. Object Rotation Effects on the Timing of a Hitting Action. 2, 130–137.

Biomechanics. Neuromuscular Control and Coordination During Cycling. 1, 16–22.

Body composition. Comparison of Anthropometry to Dual Energy X-Ray Absorptiometry: A New Prediction Equation for Women. 3, 248–258.

Body fat. Comparison of Anthropometry to Dual Energy X-Ray Absorptiometry: A New Prediction Equation for Women. 3, 248–258.

Body mass index. Relationships Between Body Composition and Fundamental Movement Skills Among Children and Adolescents. 3, 238–247.

Children. Self-Efficacy Theory and the Theory of Planned Behavior: Teaching Physically Active Physical Education Classes. 3, 288–297.

Cognitive function. Physical Activity and Executive Control: Implications for Increased Cognitive Health During Older Adulthood. 2, 176–185.

Complex movement. Practice Changes the Usage of Moment Components in Executing a Multijoint Task. 2, 138–147.

Concepts. High School Students' Physical Education Conceptual Knowledge. 3, 272–287.

Confirmatory factor analysis. Factorial Validity and Invariance of a Self-Report Measure of Physical Activity Among Adolescent Girls. 3, 259–271.

Contextual interference. Random Practice Can Facilitate the Learning of Tasks That Have Different Relative Time Structures. 2, 197–202.

Curriculum. Ice Can Look Like Glass: A Phenomenological Investigation of Movement Meaning in One Fifth-Grade Class During A Creative Dance Unit. 3, 298–314.

Cutting. Gender Differences Among Sagittal Plane Knee Kinematic and Ground Reaction Force Characteristics During a Rapid Sprint and Cut Maneuver. 1, 31–38.

Cycling. Adapting to Changing Task Demands: Variability in Children's Response to Manipulations of Resistance and Cadence During Pedaling. 4, 361–369.

Cycling. Temporal Aspects of the VO2 Response at the Power Output Associated With VO2peak in Well Trained Cyclists—Implications for Interval Training Prescription. 4, 423–428.

Decision field theory. Individual Differences of Action Orientation for Risk Taking in Sports. 3, 326–336.

Decision making. Individual Differences of Action Orientation for Risk Taking in Sports. 3, 326–336.

Decisional balance. Cross-Cultural Comparison of American and Finnish College Students' Exercise Behavior Using Transtheoretical Model Constructs. 1, 92–101.

Degrees of freedom. Neuromotor Issues in the Learning and Control of Golf Skill. 1, 9–15.

Determinants. Attraction to Physical Activity Mediates the Relationship Between Perceived Competence and Physical Activity in Youth. 1, 107–111.

Disuse. Neural Issues in the Control of Muscular Strength. 1, 3–8.

Dual-task paradigm. Time Course of Attention and Decision Making During a Volleyball Set. 1, 102–106.

DXA. Comparison of Anthropometry to Dual Energy X-Ray Absorptiometry: A New Prediction Equation for Women. 3, 248–258.

Dynamical systems. Neuromotor Issues in Human Performance: Introduction. 1, 1–2.

EMG. Neural Issues in the Control of Muscular Strength. 1, 3–8.

Estimating aerobic capacity. Cross-Validation of the YMCA Submaximal Cycle Ergometer Test to Predict VO2max. 3, 337–342.

Event-related potentials. Physical Activity and Executive Control: Implications for Increased Cognitive Health During Older Adulthood. 2, 176–185.

Exercise. Attraction to Physical Activity Mediates the Relationship Between Perceived Competence and Physical Activity in Youth. 1, 107–111.

Exercise. Neural Issues in the Control of Muscular Strength. 1, 3–8.

Exercise. Neuromotor Issues in Human Performance: Introduction. 1, 1–2.

Exercise. Personal and Clinical Exercise-Related Attitudes and Behaviors of Freshmen U.S. Medical Students. 2, 112–121.

Exercise intensity and duration. Does Equating Total Volume of Work Between Two Different Exercise Conditions Matter When Examining Exercise-Induced Feeling States? 2, 209–215.

Expert teachers. Expert Golf Instructors' Student-Teacher Interaction Patterns. 1, 60–70.

Feeling states. Does Equating Total Volume of Work Between Two Different Exercise Conditions Matter When Examining Exercise-Induced Feeling States? 2, 209–215.

Female. Promoting Physical Activity Among Sedentary Women Using Pedometers. 2, 122–129.

Female athletes. Gender Differences Among Sagittal Plane Knee Kinematic and Ground Reaction Force Characteristics During a Rapid Sprint and Cut Maneuver. 1, 31–38.

Feminism. Learning to Read Gender Relations in Schooling: Implications of Personal History and Teaching Context on Identifying Disempowerment for Girls. 4, 400–412.

Fitness. Self-Efficacy Theory and the Theory of Planned Behavior: Teaching Physically Active Physical Education Classes. 3, 288–297.

Forgetting. Effects of Repeated Retention Tests on Learning a Single Timing Task. 1, 39–46.

Gender equity. Coeducational and Single-Sex Physical Education in Middle Schools: Impact on Physical Activity. 4, 446–449.

Golf instruction. Expert Golf Instructors' Student-Teacher Interaction Patterns. 1, 60–70.

Golf putting. Distribution of Practice and Metacognition in Learning and Long-Term Retention of a Discrete Motor Task. 2, 148–155.

Grade-related difference. Children's Motivation in Elementary Physical Education: A Longitudinal Study. 1, 71–80.

Handedness. What Determines Limb Selection for Reaching? 1, 47–59.

Health. American Adults' Knowledge of Exercise Recommendations. 3, 231–237.

Health. Self-Efficacy Theory and the Theory of Planned Behavior: Teaching Physically Active Physical Education Classes. 3, 288–297.

Health promotion. American Adults' Knowledge of Exercise Recommendations. 3, 231–237.

Health promotion. Promoting Physical Activity Among Sedentary Women Using Pedometers. 2, 122–129.

High-intensity interval training. Temporal Aspects of the VO2 Response at the Power Output Associated With VO2peak in Well Trained Cyclists—Implications for Interval Training Prescription. 4, 423–428.

Instructional expertise. Expert Golf Instructors' Student-Teacher Interaction Patterns. 1, 60–70.

Instruments. Effects of Different Combinations of Intensity Categories on Self-Reported Exercise. 4, 429–433.

Interference. Effects of Repeated Retention Tests on Learning a Single Timing Task. 1, 39–46.

Intersegmental dynamics. Practice Changes the Usage of Moment Components in Executing a Multijoint Task. 2, 138–147.

Intervention. American Adults' Knowledge of Exercise Recommendations. 3, 231–237.

Intervention. Promoting Physical Activity Among Sedentary Women Using Pedometers. 2, 122–129.

Iron status. Effect of Acute 60 and 80% VO2max Bouts of Aerobic Exercise on State Anxiety in Women of Different Age Groups Across Time. 2, 165–175.

Joint torque. Segmental and Kinetic Contributions in Vertical Jumps Performed With and Without an Arm Swing. 3, 216–230.

Judgments of learning. Distribution of Practice and Meta-cognition in Learning and Long-Term Retention of a Discrete Motor Task. 2, 148–155.

Kinematics. Adapting to Changing Task Demands: Variability in Children's Response to Manipulations of Resistance and Cadence During Pedaling. 4, 361–369.

Kinematics. Neuromuscular Control and Coordination During Cycling. 1, 16–22.

Kinematics. Segmental and Kinetic Contributions in Vertical Jumps Performed With and Without an Arm Swing. 3, 216–230.

Kinesthesia. Kinesthetic Perception of the Vertical as a Function of Sport Experience. 4, 440–445.

Kinesthesis. Neuromotor Issues in the Learning and Control of Golf Skill. 1, 9–15.

Kinetics. Neuromuscular Control and Coordination During Cycling. 1, 16–22.

Knee injury. Gender Differences Among Sagittal Plane Knee Kinematic and Ground Reaction Force Characteristics During a Rapid Sprint and Cut Maneuver. 1, 31–38.

Leisure activity. Physical Activities and Sedentary Pursuits in African American and Caucasian Girls. 4, 352–360.

Low back. Quantification of Isometric Lumbar Extension Strength Using a BackUP™ Lumbar Extension Dynamometer. 4, 434–439.

Manual asymmetry. What Determines Limb Selection for Reaching? 1, 47–59.

Maximal oxygen consumption. Cross-Validation of the YMCA Submaximal Cycle Ergometer Test to Predict VO_2max. 3, 337–342.

Measurement. Factorial Validity and Invariance of a Self-Report Measure of Physical Activity Among Adolescent Girls. 3, 259–271.

Measures. Effects of Different Combinations of Intensity Categories on Self-Reported Exercise. 4, 429–433.

Memory updating. Effects of Repeated Retention Tests on Learning a Single Timing Task. 1, 39–46.

Methods. Analysis of Coaching Science Research Published From 1970–2001. 4, 388–399.

Modeling. Individual Differences of Action Orientation for Risk Taking in Sports. 3, 326–336.

Monocular. Object Rotation Effects on the Timing of a Hitting Action. 2, 130–137.

Motor acquisition. Practice Changes the Usage of Moment Components in Executing a Multijoint Task. 2, 138–147.

Motor asymmetry. What Determines Limb Selection for Reaching? 1, 47–59.

Motor behavior. Neuromotor Issues in Human Performance: Introduction. 1, 1–2.

Motor development. Adapting to Changing Task Demands: Variability in Children's Response to Manipulations of Resistance and Cadence During Pedaling. 4, 361–369.

Motor learning. Sensory Integration in the Learning of Aiming Toward "Self-Defined" Targets. 4, 381–387.

Motor pattern. Practice Changes the Usage of Moment Components in Executing a Multijoint Task. 2, 138–147.

Motor program. Random Practice Can Facilitate the Learning of Tasks That Have Different Relative Time Structures. 2, 197–202.

Motor skills. Relationships Between Body Composition and Fundamental Movement Skills Among Children and Adolescents. 3, 238–247.

Movement accuracy. Movement Time Modulates Spatial Assimilation Effects in Rapid Bimanual Movements. 2, 203–208.

Movement speed. Movement Time Modulates Spatial Assimilation Effects in Rapid Bimanual Movements. 2, 203–208.

Muscle. Neuromuscular Control and Coordination During Cycling. 1, 16–22.

Muscle. Segmental and Kinetic Contributions in Vertical Jumps Performed With and Without an Arm Swing. 3, 216–230.

Neural plasticity. Neuromuscular Characteristics of Endurance- and Power-Trained Athletes. 1, 23–30.

P3. Physical Activity and Executive Control: Implications for Increased Cognitive Health During Older Adulthood. 2, 176–185.

Patient counseling. Personal and Clinical Exercise-Related Attitudes and Behaviors of Freshmen U.S. Medical Students. 2, 112–121.

Patriarchy. Learning to Read Gender Relations in Schooling: Implications of Personal History and Teaching Context on Identifying Disempowerment for Girls. 4, 400–412.

Pedagogy. Analysis of Coaching Science Research Published From 1970–2001. 4, 388–399.

Periodization. A Meta-Analysis of Periodized Versus Non-periodized Strength and Power Training Programs. 4, 413–422.

Philosophy. Ice Can Look Like Glass: A Phenomenological Investigation of Movement Meaning in One Fifth-Grade Class During A Creative Dance Unit. 3, 298–314.

Physical activity. American Adults' Knowledge of Exercise Recommendations. 3, 231–237.

Physical activity. Cross-Cultural Comparison of American and Finnish College Students' Exercise Behavior Using Transtheoretical Model Constructs. 1, 92–101.

Physical activity. Effects of Different Combinations of Intensity Categories on Self-Reported Exercise. 4, 429–433.

Physical activity. Self-Efficacy and the Stages and Processes of Change Associated With Adopting and Maintaining Muscular Fitness-Promoting Behaviors. 2, 186–196.

Physical education concept. Value Orientations of Elementary and Secondary Physical Education Teachers in Flanders. 2, 156–164.

Physicians. Personal and Clinical Exercise-Related Attitudes and Behaviors of Freshmen U.S. Medical Students. 2, 112–121.

Pointing. Sensory Integration in the Learning of Aiming Toward "Self-Defined" Targets. 4, 381–387.

Policy. Coeducational and Single-Sex Physical Education in Middle Schools: Impact on Physical Activity. 4, 446–449.

Postmodern. Learning to Read Gender Relations in Schooling: Implications of Personal History and Teaching Context on Identifying Disempowerment for Girls. 4, 400–412.

Posture. Kinesthetic Perception of the Vertical as a Function of Sport Experience. 4, 440–445.

Practice strategies. A Longitudinal Perspective of the Relationship Between Perceived Motivational Climate, Goal Orientations, and Strategy Use. 3, 315–325.

Processes of change. Cross-Cultural Comparison of American and Finnish College Students' Exercise Behavior Using Transtheoretical Model Constructs. 1, 92–101.

Progressive resistance exercise. A Meta-Analysis of Periodized Versus Nonperiodized Strength and Power Training Programs. 4, 413–422.

Psychology. Self-Efficacy Theory and the Theory of Planned Behavior: Teaching Physically Active Physical Education Classes. 3, 288–297.

Qualitative research. Ice Can Look Like Glass: A Phenomenological Investigation of Movement Meaning in One Fifth-Grade Class During A Creative Dance Unit. 3, 298–314.

Race. Physical Activities and Sedentary Pursuits in African American and Caucasian Girls. 4, 352–360.

Regulatory continuum. Relationships Between Exercise Regulations and Motivational Consequences in University Students. 1, 81–91.

Reliability. Quantification of Isometric Lumbar Extension Strength Using a BackUPÔ Lumbar Extension Dynamometer. 4, 434–439.

Repeated testing effects. Effects of Repeated Retention Tests on Learning a Single Timing Task. 1, 39–46.

Resistance training. A Meta-Analysis of Periodized Versus Non-periodized Strength and Power Training Programs. 4, 413–422.

Resistance training. Self-Efficacy and the Stages and Processes of Change Associated With Adopting and Maintaining Muscular Fitness-Promoting Behaviors. 2, 186–196.

Response preparation. At the Crossroads: Contributions of Response Selection Processes to Human Performance. 4, 343–351.

Response scales. Effects of Different Combinations of Intensity Categories on Self-Reported Exercise. 4, 429–433.

Review. Analysis of Coaching Science Research Published From 1970–2001. 4, 388–399.
